Of the women medical students at present studying at Paris, eighteen are French, one American, six English, 103 Russians, three Roumanians, two Turks and one Greek.

MR. AND MRS. PETER BURKE, of Princeton Junction, N. J., have declined an offer of \$2,000 and expenses to exhibit their year-old triplets at Chicago during the World's fair.

EXPERIMENTS have shown that a person speaking in the open air can be heard about equally as well at a distance of one hundred feet in front, seventy-five at each side, and thirty behind.

MR. GRADSTONE is the owner of the largest lead pencil in the world. It is the gift of a pencil maker at Kewwick, and is thirty-nine inches in length. In place of the customary rubber cap it has a gold cap. Its distinguished owner uses it for a walking stick.

GOLD is weighed by troy weight, while feathers are weighed by avoirdupois; and as the 12 ounces in a pound troy contains but 5,770 grains, while the avoirdupois pound contains 7,000, grains the pound of feathers is 1,230 grains heavier than the pound of gold.

THERE are many people now living who will have only one birthday, to celebrate for nearly twelve years to come. This strange circumstance is due to the fact that they were born on February 29, and to the further fact that the year 1900 will not be a leap year.

FEMININE drummers are said to sell more goods in one day than the average masculine tourist in a week. Wholesale houses, furniture, tea and dry-goods establishments are selecting bright, energetic members from the ranks of the sisterhood to represent them, and, as a rule, with unqualified success.

THERE are so few buffalo left in America as to make it interesting to learn that Queen Victoria has sent one from her farm at Frogmore to the grounds of the Zoological society in London. This buffalo is the survivor of a pair sent by the Marquis of Lorne from Canada as a present to her majesty a few years ago.

For the first time in the history of political national conventions in the United States the republican national convention at Minneapolis will contain a full blooded Indian, and that Indian will be a delegate from Oklahoma. He is "White Turkey," chief of the Shawnees, and is a lineal descendant of that old war chief, Tecumseh.

The women of the upper Congo are wedded by a large neckring of a finger-ring. Many of these rings weigh thirty or forty pounds. They are burdensome, and often tire a woman so that she is seen supporting the ring with her hands. Yet these neckrings are regarded as a great ornament, and the heavier they are the higher a woman ranks socially.

The electrical process of execution may suspend consciousness at once, but after the application of the most powerful current the heart continues to beat for several minutes. In the latest execution at Albany the heart-beats were felt until the current had been turned on three times. A new chair was provided for this occasion, and a new method again employed.

The highest velocity ever given to a cannon ball is estimated at 1,025 feet per second, being equal to a mile in 3.2 seconds. The velocity of the earth at the equator, due to its rotation on its axis, is 1,000 miles per hour, or a mile in 3.6 seconds. Therefore, if a cannon ball were fired due west and could maintain its initial velocity, it would beat the sun in his apparent journey around the earth.

The king and queen of Greece have been married twenty-five years, and continue to live for each other in good, old-fashioned affection. The queen, says a writer in Figaro (Paris), although she has brought up a family of seven children, has preserved all the grace of early youth. Her charming smile softens her Slavonic beauty, which she inherits from her father, the grand Duke Constantine, who was one of the handsomest men at the Russian court.

A MAN named M. E. Johnson, in New York, with money enough to make his home at the Murray Hill hotel, now represents the business affairs of an electric inventor who claims to have perfected a device for annihilating fog. Successful experiments are said to have been made at Sandy Hook and in Boston harbor. The force used is in the form of electric discharges, which seem to clear the atmosphere of dampness, much as alum in muddy water will clear it.

The launch of the Raleigh at Norfolk, a few days ago adds another fine warship to those we have already afloat. She is the first unarmored modern steel war vessel ever put into the water at the government yards, and is likely enough to be the first completed. The Maine preceded her at the Brooklyn yard, but is an armored vessel, the completion of which is likely to be delayed beyond that of the Raleigh. The latter and the Cincinnati were begun by Secretary Tracy's orders in the navy yards, because the bids of the contractors were not within the limit fixed by congress.

**FURNISHING THE CHAMBERS.**  
One can get a chamber set for as low a sum as twenty-five dollars; but the prices run up rapidly until the hundreds are reached. Handsome, well-made sets, with little or no ornamentation (the quality of the wood and the finish giving them a simple elegance not found in more showy pieces) cost from forty to seventy-five dollars. The set includes bedstead, dressing-case, washstand, towel-rack, a small table, two common chairs and a rocker. The more expensive sets have the English washstand. No marble is used with the finest chamber furniture. The springs, mattresses, etc., must be purchased separately, as a rule. Have good ones. Have shades and plain muslin curtains for the windows. Stain the floors, if possible. If you prefer not to do that, use straw matting, with one rug beside the bed and another in front of the washstand. In buying the toilet set select one that has a plain, fine shape and simple decoration.—Ladies' Home Journal.
